Aristotle

BY bouquet

HAVE A **DIALOGUE** WITH YOUR **DATA**

We learn by asking questions

- Does it take too long to get answers to your data question?
- Too much going back forth with employees, dashboards?
- How many questions would you like to ask in order to get answers?
- How many questions go unanswered simply because you don’t know you can get them?

The Problem

Dashboard fatigue

- You don’t have time to browse and access dashboards
- You’re looking for information that’s not there
- You forgot how to use the product’s features

Dependency on analysts

- It’s hard to describe the brief
- It takes hours or days to get an answer
- Not available 24/7/365

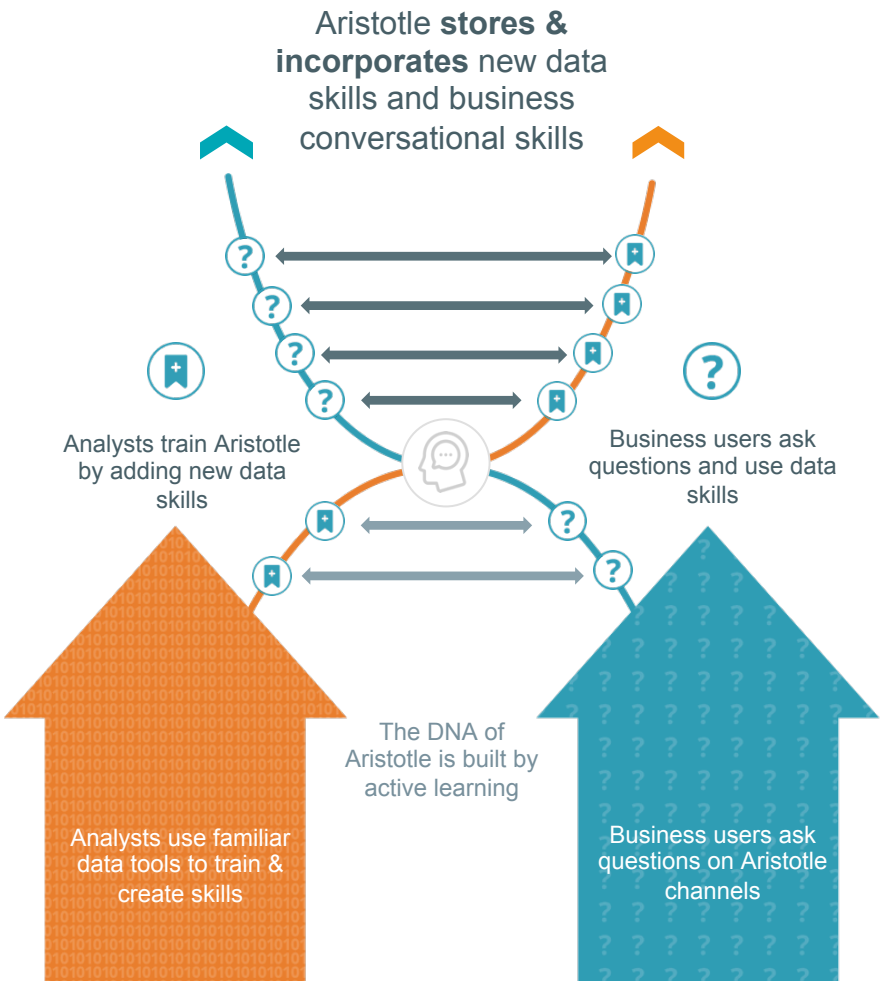
What makes Aristotle unique

The secret sauce IP that power Aristotle



ARISTOTLE SKILLS *

Powered by learning

Like all great educators, Aristotle learns from everyone. Analysts train Aristotle on new datasets and daily users alike train Aristotle new conversational skills. As more questions are asked, answers found and skills created -- **everyone gains**.

* patent pending
